

# NATURACULTURE LTD

## The Target Pruning Poster for sale Australia wide

We are grateful to announce that our sponsor ETS Vegetation Management has given Naturaculture Ltd the approval to sell a highly useful educational tool - the (Shigo based) Target Pruning Poster. This Cassian developed on behalf of ETS and we sold in Australia and NZ between 2008 & 2010. Being able to work from a reduced profit margin with reduced production costs means we can now sell this at a significantly reduced price. The poster is an essential learning tool to assist contractual staff & students of arboriculture to learn how to prune trees to their natural morphology and standards such as AS/4373-2007.

- Based on Modern Arboriculture by Dr Alex Shigo.
- A photographic and diagrammatic guide to the removal and shortening of leaders and limbs to trunk collars on trees.
- Accompanying Target Pruning Manual is sent electronically as a PDF file with each order of the poster.
- Edited by Judy Shigo.

Prices including delivery/GST for:

Long lasting poly prop/laminate AO sized (1189 x 841mm) commercial poster for depots and class rooms – **\$225.50 (incl GST & delivery)**. For orders please make contact via -
